

A landscape of rolling green hills with several wind turbines under a sunset sky. The sun is low on the horizon, creating a warm glow and long shadows. The sky is filled with soft, colorful clouds in shades of blue, purple, and orange. The wind turbines are scattered across the hills, with some in the foreground and others in the distance. The overall scene is peaceful and scenic.

Our German Energy & Infrastructure Capabilities

| 2020

Our Team

The German Energy & Infrastructure group advises domestic and foreign enterprises, sponsors, banks and financial investors on M&A, joint ventures, projects and related financings in the energy and infrastructure sector. In our Energy & Infrastructure group, we have combined our longstanding interdisciplinary experience with our in-depth industry expertise to provide tailor made solutions to various players in the energy and infrastructure sector, covering all relevant areas of law, including all relevant asset classes.

Our German Energy & Infrastructure group is part of the Firm's global Energy, Mining and Infrastructure (EMI) group and thus works closely together with EMI colleagues from key jurisdictions across six continents, making sure every project and transaction receives the assistance of lawyers who fully understand the energy and infrastructure sector as well as the resources to get deals done. As part of our commitment to the European energy sector, Christopher Jones joined our Brussels office in 2018 from his position as Deputy Director for Energy at the European Commission.

Beyond the skills of our Energy & Infrastructure group, we are able to call upon our Global Climate Change team - the world's leading, and largest climate change practice - to advise on the broader aspects of energy projects, climate change and environmental matters.

Our Capabilities

We help clients with M&A transactions in the energy and infrastructure sector | Acquisition and disposal of transmission networks, storages, renewables, energy generation assets and portfolios | Joint ventures | EPC, construction, operation, management and service contracts and other project agreements | Regulatory issues | Power purchase agreements and long-term / large-scale supply contracts | Government approvals, permitting and compliance | Acquisition and project finance | Regulatory investigations into energy trading / Financial services regulatory aspects of energy trading

What Others Say

M&A Law Firm of The Year JUVE Awards | 2019

“The team covers not only energy but also other infrastructure sectors, which makes it a one-stop shop. I highly value the breadth of the expertise.” | Chambers Europe 2020
